

# THE ALL-IN-ONE SOLUTION FOR ON-SITE DATA SECURITY

## *INTRODUCING THE MVP-101® . . .*

You just won't find another safe that combines this level of protection with the convenience of a compact size and easy access. The MVP-101 is the sensible, economical choice in data protection for any business, large or small.

**MEDIAVAULT**

1 MADISON ST., EAST RUTHERFORD, NJ 07073

**Protection of business records is crucial for your company's survival.**

Insurance company statistics show that 40% of all businesses experiencing a fire are forced to shut down within two months, mostly because vital records—accounts receivable, customer lists, inventory records—are lost to flames and water damage.

**If yours is among the growing number of companies entrusting business data to fragile computer disks and tapes, you need the specialized protection offered only by the MVP-101.**

The **MEDIAVAULT MVP-101** was designed from the ground up to meet the special requirements for protecting computer diskettes and tapes. To achieve this high level of performance, MEDIAVAULT engineers developed and patented a technologically advanced insulation material. It's thinner, lighter, and outlives standard insulation materials that lose their effectiveness over time.

**The MVP-101 provides on-site protection from:**

- fire
- excessive heat
- humidity
- vandalism
- magnetic disturbances
- unauthorized access
- accidental loss or damage

The MVP-101 is capable of withstanding heat reaching 1700° Fahrenheit over the course of an hour, while the interior storage area remains well below 125° Fahrenheit—the acceptable limit of safety for disks and tape cartridges. Plus the hermetic seal of the door totally shuts out the water and smoke that almost always accompany a fire.

**The MVP-101 encourages computer users to follow recommended operational procedures by providing a convenient, protected location to store and organize all disks and tapes.**

At only 15 inches square, the MVP-101 is small enough to sit on a credenza, file cabinet or shelf, right next to your computer. Despite its small size, the MVP-101 handles up to 115 5¼" floppy disks, 135 3½" diskettes, or twelve tape cartridges. It also accommodates popular disk storage boxes and library cases with ease.

**Access Control**

The MVP-101 is secured by a virtually pick-proof, UL listed, high security MEDECO keylock. It keeps unauthorized persons out, yet gives you quick and easy access to your data whenever you need it. The key can be removed in the open position for convenient access during the work day. *(It is recommended that the unit be locked at all times to assure against unauthorized access as well as fire protection.)* The MVP-101 can be bolted down for added security.

**External Dimensions      Internal Dimensions**

	INCHES	METRIC	INCHES	METRIC
HEIGHT:	14 <sup>5</sup> / <sub>8</sub> "	373 MM	6 <sup>7</sup> / <sub>8</sub> "	175 MM
WIDTH:	15 <sup>5</sup> / <sub>8</sub> "	398 MM	8 <sup>5</sup> / <sub>8</sub> "	220 MM
OVERALL DEPTH:	15"	381 MM	6 <sup>3</sup> / <sub>4</sub> "	172 MM

Our aim is to constantly improve our products; we therefore reserve the right to alter specifications without prior notice.

**Weight**

SHIPPING WEIGHT:	69.5 LBS*	31.6 KGS
NET:	67.0 LBS	30.4 KGS

**\*The MVP-101 is the only magnetic media safe shippable by UPS, which eliminates excessive costs of freight and installation.**

**Media storage capacity**

115 5¼" loose diskettes • 135 3½" loose diskettes • 12 tape cartridges • 40 mini tape cartridges

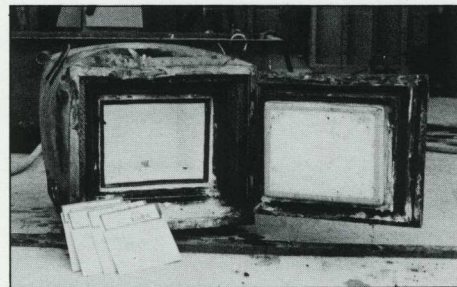

**The MVP-101 can also be used to store other heat and humidity-sensitive materials such as microfiche, optical compact disks, photographic film media, videotapes, and stamp collections.**

This product is warranted pursuant to terms of the company's limited warranty set forth on a contract of sale and is subject to the limitations stated therein.

Should your MVP-101 be exposed to fire, contact your dealer regarding our special replacement program.

3M is a trademark of Minnesota Mining and Manufacturing

The MVP-101 after testing — While the outside is charred and swollen from heat, both the media storage area and data contained on the diskettes remained intact.
