

**Professional protection with the**

**Kaso Data Safe**

 **KASO OY**

Kaso Data Safes are equipped inside with hole sliders, on which all inner fittings can be fastened simply and safely without tools.

The distance between the holes is 7.5 mm (19/64") (= 1 raster)

Types DS 3020 and 3120 have 10 rasters (units of height) and Types DS 3060 and 3160 have 180 rasters (units of height). Therefore you can use either 100 or 180 rasters.

				Kaso Data Safe 3120 and 3020					Kaso Data Safe 3160 and 3060
