Tann® *Fortress TRTL15x6 Plus*

1 1/2 hour fire label

John Tann Security Limited is the oldest safe maker in the world. During the reign of King George II (1727-1760) The House of Tann manufactured burglary-resistant iron-bound treasure chests. In 1795 Edward Tann founded the world's first firm of safe makers, John Tann. Throughout the company's history it was essential to be one step (at least) ahead of the burglar's technical ingenuity - a continuous spur to product development. Tann operated from factories in England, Canada and Sweden and is represented in many other countries.

We proudly present the second of a new generation of high security safes. The **Tann 15X6 plus**.

This safe combines beauty and strength to withstand all forms of attack by today's sophisticated burglar. The Plus for the owner of a Tann X6 Plus is a 90-min. Swedish fire label added to the U.L. TRTL15X6 label, truly a safe for the future and an investment in peace of mind.

STANDARD FEATURES

- 1 1/2 hr. fire-resistant certification
- Changeable keylock (acid resistant)
- Rigger's key combination

In line with our policy to provide only the best in total security we reserve the right to incorporate any improvement and alter any specification without prior notice.

Note: 7026 and 7036 sizes supplied without plinth

CONSTRUCTION

Door:

Total door thickness is 7 7/8" with a minimum of 5 1/4 " of multiple barrier material - a combination of copper, Tann Alloy II and a special high security Densit. Multiple barrier layers force an attacker to change tools.

Body:

Total body thickness (sides, top, bottom, and back) is 5 5/16" - a composite of copper, Tann Alloy II and special high security Densit layers with added protection of stainless and copper laminates.

Locking Mechanism and Boltwork

Standard locking - one Sargent & Greenleaf manipulation proof combination lock and one 9-lever high-security double-bitted changeable (customer changeable) acid-resistant keylock. Keys supplied in triplicate. The combination lock is fitted with a spy-proof dial and dial check lock.

The Tann X6 plus is equipped with a powerful 2-way sliding bolt system, complete with random relocking and cross-locking devices within a massive recessed door. Unique to the safe making industry, this door provides ultimate strength against concentrated attacks - wedging, explosives and all other forms of attack known today.

Hold-Up Deterrent Features:

For additional locking protection, each door is prepared to accept a 144 hr. two or three movement S & G or LaGard time lock.

A specially-prepared concealed access for hidden alarm wiring is standard.

Furniture and Fixtures:

A chrome capstan pull handle and chrome-finish fascia plate accent the front of the door. All models feature fully adjustable shelves; some models are equipped with locking jewelers cupboard. (3520 - 2 shelves standard, 4720 - 3 shelves, cupboard standard, 5920 - 3 shelves, cupboard standard, 7026 - 5 shelves standard, 7036 - 5 shelves standard.) The safe is finished in a pleasing textured finish of light grey color.
