The Diamond TDR 3900 Series is the result of our continuing effort to develop high quality security products to better meet the requirements of a wide variety of end users. **Maximum security** is assured by the utilization of our TDR cast alloy defense material, consisting of a torch resistant aluminum casting with drill resistant corundum nuggets. *Its thorough overall design plus body and door casting provides consistent six-sided protection throughout*, proven to withstand concentrated torch, tool, disk cutter and explosive attacks. The only real difference between the 3900 series and the 4000 series is that 2 locks are required on the 4000 series which is why insurance underwriters consider the 3900 series equivalent to the TRTL-15x6 security level.
